

COA Version 01; Issued 13 February 2020

Certificate of Analysis SALSA® MLPA® Probemix P222 LCA mix-2

Catalogue #	P222-025R, P222-050R, P222-100R	
Product name	Probemix P222 LCA mix-2	
LOT	B2-1119	
Σ	25, 50, or 100 reactions.	
Shipping conditions	Dry ice or cooling elements.	
	Store upon arrival between -25°C and -15°C.	
	Expiration date: November 2024, when stored at recommended conditions. should not be frozen/thawed more than 25 times.	This product
Use	This product has been developed to determine the DNA copy number of the human <i>GUCY2D</i> , <i>RDH12</i> and <i>RPGRIP1</i> genes, and the presence of the c.2991+1655A>G mutation in the <i>CEP290</i> gene. See table 1 and 2 of the product description for more information. This probemix is designed for use only in combination with SALSA MLPA reagent kits and Coffalyser.Net as described in the MLPA General Protocol.	
Quality control specifications	 Sufficient distance between peaks, absence of extra or shoulder peaks, and completeness of hybridisation of each individual probe, as tested on Applied Biosystems and Beckman/SCIEX GeXP sequencers. Standard deviation of each individual probe ≤0.10, when tested on 23 different DNA samples of healthy individuals, extracted by various methods. Each individual probe meets reaction-specific criterial when tested on a single DNA sample under various experimental conditions. No DNA controls result in only five major peaks shorter than 121 nucleotides (nt): four Q-fragments at 64, 70, 76 and 82 nt, and one 19 nt peak corresponding to the unused portion of the fluorescent PCR primer. Non-specific peaks longer than 121 nt AND with a height <25% of the median of the four Q-fragments are not expected to affect MLPA reactions when sufficient (50-250 ng) sample DNA is used. 	Test result PASS

None of the ingredients are derived from humans, animals, or pathogenic bacteria. Based on the concentrations present, none of the ingredients are hazardous as defined by the Hazard Communication Standard. **A Safety Data Sheet (SDS)** is not required for these products: none of the preparations contain dangerous substances (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and amendments) at concentrations requiring distribution of an SDS (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and 1907/2006 [REACH] and amendments). If spills occur, clean with water and follow appropriate site procedures.

Certificate of Analysis SALSA MLPA Probemix P222-B2 LCA mix-2 sample picture

Figure 1. Capillary electrophoresis pattern from a sample of approximately 50 ng human male control DNA analysed with SALSA MLPA Probemix P222 LCA mix-2 (B2-1119).

This lot was certified by MRC-Holland on 13 February 2020.

This certificate is a declaration of analysis at the time of the manufacturing process. All assays were run in compliance with manufacturer's instructions for use.
